# The Navies of Five Nations

Use the Same Quality Plates You Find in Gould Automobile Storage Batteries.

The submarines of five nations are driven under the waters by the powerful performance of their Gould storage batteries, equipped with the famous Dreadnaught plates.

The Gould battery, whether it be for submarine, railroad, farm lighting plant or automobile, has one outstanding, distinct and fundamentally different feature—the Dreadnaught plate.

Dreadnaught plates are based on an exclusive Gould formula, perfected eleven years ago, and never successfully imitated. The Gould battery is famous for its rugged, upstanding quality. It is the super-hard quality of Dreadnaught plates that brings fame to the Gould Battery, and economy to its user.

Dreadnaught plates and Gould storage batteries are the product of skilled plate makers, backed by a generation of experience in the largest and most complete storage battery plant in America. Your Gould Automobile Battery is made by the same hands in the same plant as the giant submarine batteries of Five Nations

## Only Gould Service Stations Can Repair Any Storage Battery with the Dreadnaught Plates.

When you need a new battery, or repairs, visit the Gould Service Station nearest you. Any make of storage battery can be repaired with Gould parts, for they are interchangeable.
